## PUZZLE PIECE PANIC!

Try to place as many puzzle pieces  
before the Well fills up!

---

## IMPORTANT!

Always be sure that the power to your Odyssey<sup>2</sup> console is turned off before inserting a game cartridge. This protects the electronic components and extends the life of the unit.

## TO BEGIN:

- 1 Insert the cartridge into the slot of the Odyssey<sup>2</sup> console with the label side of the cartridge facing the alpha-numeric keyboard.
- 2 Turn on the power by pressing the power button on the console. SELECT GAME will appear on your TV screen. If it does not, press the RESET key on the alpha-numeric keyboard.

On-screen colors may vary according to TV's color adjustments and system variations.

The mindless Tetrad Ejecting Device (or T.E.D.) is spewing out an endless series of Tetrad Puzzle Pieces into the Well. Your mission is to maneuver these Tetrads so they disintegrate before the Well fills up!

# PUZZLE PIECE PANIC!

1 Use either controller to change the game settings. Up / Down change the field, Left / Right change the value. Or, use the keyboard. Keys A - D select the GAME. Keys 0 - 9 select the LEVEL. The + and - keys change the HEIGHT.

2 **GAME:** A - D, see chart on next page  
**LEVEL:** starting level; 0=slow, 9=fast  
**HEIGHT:** starting blocks; 0=empty

3 When done, move to START, or press ENTER on the keyboard, then press the ACTION BUTTON to start.

4 The object of the game is to move and rotate the endless falling puzzle pieces (or Tetrads) so they evenly complete a line of 10 blocks across. When this happens, the line will disintegrate. More than one line at a time may be formed.

5 In GAMES A and B, the pieces above this line will then collapse. In GAMES C and D, the pieces will be still. In GAMES B and D, the goal is to remove 25 lines.

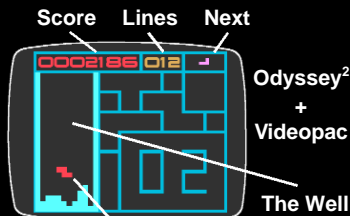

6 To control a puzzle piece, move the controller LEFT or RIGHT. To speed up the piece's descent and gain extra points, move the controller DOWN.

7 To rotate a piece counter-clockwise, press the ACTION BUTTON. To rotate it clockwise, hold the controller UP while pressing the ACTION BUTTON. Note: A piece may not be able to rotate if there is no room to do so.

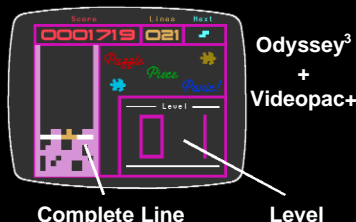

8 The top-right box tells which piece is next. Turn this off or on by pressing any key (except for RESET) during play.

9 The game ends when the Well fills up and no room is left for a new piece. Music will then begin to play. Press the ACTION BUTTON to restart.
